Art Unit: 1796

1. The amendment of 11/24/08 has been entered. Claims 2-5, 7-13, 15-37, 61-70 are pending.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2-5, 7-9, 13, and 15-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

A. Cancellation of “isocyanate terminated” of claim 3 opens the scope of the claims to prepolymers that are not isocyanate terminated. There is not basis in the originally filed specification for the prepolymers that are not isocyanate terminated. See section [0021] of the originally filed specification for example. The blocking step of requirement (b) of the instant claim 3 is noted but it is not seen that this step absolutely requires unreacted NCO groups, i.e. it may only require the blocking step if there are unreacted NCO groups. Requirement (d) of the instant claim 3 is noted. However, it is optional. The newly added scope of prepolymers that are not isocyanate terminated is not described in the originally filed specification and is therefore new matter.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1796

5. Claims 2-5, 7-13, and 15-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. It is unclear if the instant claim 3, (b) “the unreacted isocyanate groups” requires unreacted isocyanate groups or applies only if unreacted isocyanate groups happen to be present because there is no longer antecedent basis for “the unreacted isocyanate groups”. The same applies to the instant claim 3, (d) except that “optionally” further makes it unclear if unreacted isocyanate groups are required or not.

6. Claims 61-70 are allowable over the prior art considered which does not teach the claimed method nor provide rationale to make other disclosed methods into the methods of these claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick D. Niland whose telephone number is 571-272-1121. The examiner can normally be reached on Monday to Thursday from 10 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
